ABOUT ME

I am a Front-End Designer and Developer. I've been working as a UI/UX Designer since 2014 and as a Front-End Developer since 2015.

I have worked in the publishing industry, in the SASS industry (CRM) and I am currently working in the transportation industry where my main focus are design and development for Kiosks, Mobile Applications, E-Ticketing Platforms and Admin applications. I also provide assistance in some DevOps functions.

I currently work extensively with React, React Native and VueJS.

DEVELOPMENT EXPERIENCE

- React
- React Native
- VueJS
- ExpressJS
- Electron
- Java
- PHP
- Classic ASP

EDUCATION

University of North Florida

B.S. in Communication
Class of 2015

EXPERIENCE

Transcor Data Services

Front-End Designer & Developer

Oct 2019 – Now

Designing and developing front-end experiences for applications ranging from Kiosks, Mobile Applications, E-Ticketing Platforms, and Admin applications, assist with more DevOps-related tasks like testing and integrating SDKs for new hardware, debugging build issues, investigating new development tools, and setting up projects from scratch.

Key Projects

- Designed and developed a brand new Driver App to become the default scanning app for the majority of bus drivers in the US.
- Headed team in charge of developing new UI library for future Transcor branded applications.
- Designing and developing a new animation library for animated icons to be used for clients and in-house applications.

GleanView

Front-End Designer & Developer

Aug 2016 – Sep 2019

Designed and developed screens and interaction for new features in the CRM app, designed and developed marketing website and landing pages, designed several branding guidelines for child apps.

Key Projects

- Designed and developed full-featured meeting scheduling system with email integration, availability search and UI calendar scheduler
- Designed a new UI Library for entire application
